REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Applicants' Figure shows the superiority of the stabilizer systems based on triazole derivatives and hydrazine derivatives of salicylaldehyde as metal deactivators. Nishiguchi et al. disclose three metal deactivators as equivalents, while Shukushima et al. disclose five of them. There is no preference shown to either metal deactivator. In Table 1, Shukushima et al. display one of applicants' favored metal deactivators, but there is no thermoplastic polyurethane among the five polymers revealed in said Table. Accordingly, the prima facie obviousness case presented by the examiner has been overcome.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
